AMENDMENT AND RESPONSE

Sir:

Before the prosecution of the above referenced continued prosecution application, please amend Claims 7, 19, and 24 and add claim 25 as follows. In addition, please amend the specification as indicated below.

- et DI
- 1 7. (Amended) A method for presenting, as an object data from a set of one or more tables
 - 2 residing in one or more databases, the method comprising the steps of:
 - 3 reading a first set of data from a plurality of cells from the set of one or more tables;
 - 4 wherein said plurality of cells includes a cell from each of a plurality of rows;
 - 5 generating a column object based on said first set of data; and
 - 6 presenting a second set of data from said set of one or more
 - 7 tables as said object that has said column object as an attribute.

C

D3
19. (Amended) A computer system, comprising:
a processor;
a memory coupled to said processor;
one or more databases;
a set of one or more tables contained in said one or more databases;
said processor configured to read a first set of data from a plurality of cells from
one or more rows from the set of one or more
tables;
wherein said plurality of cells includes a cell from each of a plurality of rows;
said processor configured to generate a column object based on said first set of
data; and
said processor configured to represent a second set of data from said set of one or more
tables as said object that has said column object as an attribute.

C3
D4
24. (Amended) A computer-readable medium carrying one or more sequences of one or more
instructions for presenting, as an object, data from a set of one or more tables residing in
one or more databases, wherein the execution of the one or more sequences of the one or
more instructions causes the one or more processors to perform the steps of:
reading a first set of data from a plurality of cells from the set of one or more tables;
wherein said plurality of cells includes a cell from each of a plurality of rows
generating a column object based on said first set of data; and
presenting a second set of data from said set of one or more tables as said object that has
said column object as an attribute.

c4 1 25. (New) A method for presenting, as an object, data from a set of one or more tables
2 residing in one or more databases, the method comprising the steps of:
3 reading a first set of data from one or more fields of a plurality rows from a set of one or
4 more tables;
5 generating a column object based on said first set of data; and
6 presenting a second set of data from said set of one or more tables as said object that has
7 said column object as an attribute.
